## University Questions

**A1:** In a few sentences, please provide feedback on your learning experience in this course. Consider the assignments and feedback you received, materials, learning activities and interactions with peers, your interactions with the instructor and other aspects related to your learning experience that you want to mention.

Yi was one of the best TA's I met in the physics department. He was very helpful during both office hours, recitation, and in lab. I couldn't thank him enough for all his help in helping me pass physics 212. The recitation activity, itself, was more effective at teaching the material than the lab in my opinion. I got a lot more out of the recitation activity each week than the lab.
Best part of physics class overall.
Recitation provided some meaningful guided practice problems for me in this course. There were always one or two questions I would be able to ask Yi to get a better understanding of the material, and he was always good at explaining the answers to me and my group.
Helpful and understanding.
Recitation is generally helpful. Yi does an excellent job of explaining the why and how behind problems, rather than simply showing how to do something. Most recitation assignments reinforce class content and extend my knowledge.

		Strongly Disagree					Strongly Agree					N	Mode	Median			
		1	2	3	4	5	1	2	3	4	5						
<b>A2</b>	The overall structure of the course (content and materials, assignments, activities) promoted a meaningful learning experience for me.	-	1	-	4	1	6	4	4								
		-	17%	-	67%	17%											
<b>A3a</b>	The instructor created a welcoming and inclusive environment.	-	-	-	2	5	7	5	5								
		-	-	-	29%	71%											

**A3b:** In the space provided, please provide an explanation for your rating in the previous question.

Yi is very helpful and takes the time to explain content meaningfully to individual students.
Yi is the only reason I am going to pass this class!! He understands how difficult the class is and his teaching style reflects that as he makes the material more digestible and easier to understand.Give this man a raise!!
Fantastic TA, really great at answering questions and helping whenever help was needed.
Could ask any question related to the recitation and be answered directly to enhance my understanding.
Yi was very welcoming and happy to teach during recitation.
I never felt unwelcome or uninvited during recitation, and the instructing TA was always attentive to our questions and helped out immensely during recitation class.
This is the second semester I have had Yi as a TA. He is a very friendly guy and always smiles when you see him. I find him to be very approachable when asking for questions and I appreciate his commitment to helping me understand topics. If I don't understand a topic the first time he always retries until I can grasp it. I have seen him do this with every student who asks him questions, so I know he treats everyone the same.

**A4:** If your course required materials, which materials or resources enhanced your learning? How?

The textbook was very helpful for learning in this course.
none
The provide equation sheets, as well as notes from class.

**A5:** What are the most important things you learned in this course?

There was no individual concept from recitation that stuck with me as useful, but I know there were multiple topics that I would not have understood as well without exposure to them in recitation, so just the general practice was the most important to me.
Physics
Electricity and Magnetism, as well as circuit analysis.

---

**A6:** Do you have any recommendations for this course?

Nothing at this time.

N/A - I think the recitation class was well managed, organized, and ran. I very much enjoyed my time in recitation particularly on account of the instructing TA just "letting us work" and providing guided assistance when he thought was necessary.
